

SDWS Structural Screws: the Anatomy of Performance

Sinks in to
any great project

Make way for a
smooth finish

We recommend
a test drive

Easy Driving
from here on

Start fast with
no pre-drilling

The **Strong-Drive® SDWS structural screw** is like no other. Its patented tip ensures fast starts, reduces torque and eliminates pre-drilling. The bold thread design provides superior holding power while the large, low-profile head eliminates washers. All of this and a double-barrier coating to resist corrosion – now that's a fastener engineered to perform.

One fastener for multiple wood projects with higher shear loads.
